

AI-POWERED RECONCILIATION FOR MODERN ENTERPRISES

The Problem

Manual reconciliation is slowing your business down. Fragmented systems, high transaction volumes, and spreadsheet-driven processes lead to:

- Delayed month-end closures
- Revenue leakages
- Audit and compliance risks
- Operational inefficiencies

In today's real-time world, reconciliation needs to be fast, intelligent, and automated.

The Solution: FinRecon

FinRecon is an AI-powered reconciliation engine that automates and unifies financial data across systems—helping enterprises reconcile faster, with accuracy and control.

Key Use Cases

- Bank & ERP reconciliation
- Payment vs settlement matching
- Order-to-cash reconciliation
- Invoice vs payment tracking
- Intercompany reconciliation
- Refunds, chargebacks & fee validation

Who It's For

1. Enterprises & corporates with multiple systems
2. Fintechs, PSPs & payment platforms
3. Marketplaces & aggregators
4. Logistics & supply chain businesses
5. Insurance & financial service providers
6. Government & public sector entities

What FinRecon Does

1. Connects ERPs, banks, PSPs, CRMs, and internal systems
2. Automates complex matching (1:1, 1:N, N:N, tolerance-based)
3. Detects mismatches and anomalies in real time
4. Enables faster exception resolution with AI insights
5. Provides audit-ready trails for compliance

Why FinRecon Stands Out

- ✓ AI-Driven Matching Engine – Handles millions of records with precision
- ✓ Generative AI Insights – Explains exceptions & suggests actions
- ✓ Plug-and-Play Integrations – APIs, SFTP, files, DBs
- ✓ Enterprise-Grade Scalability – From thousands to millions of transactions
- ✓ Audit & Compliance Ready – Full traceability (SOX, IFRS aligned)
- ✓ No-Code Rule Engine – Business users configure workflows easily

Business Impact

1. Faster Closures – Reduce month-end cycles from days to hours
2. 90% Less Manual Effort – Eliminate spreadsheet dependency
3. Real-Time Visibility – Catch issues before they escalate
4. Prevent Revenue Leakage – Ensure every transaction is accounted for
5. Better Financial Control – Accurate, reliable reporting
6. Scales With Your Growth – Multi-entity, multi-system ready

Regional Impact (GCC & MEA)

- 2,000+ reconciliation touchpoints across regions
- 450,000+ transactions/customers processed and reconciled
- 60% faster reconciliation cycles achieved
- 90% reduction in manual errors
- 15% operational cost savings

Built to support high-growth, high-volume financial ecosystems across GCC and Africa.

How It Works (Simplified)

Ingest → Match → Detect → Resolve → Report
A complete 360° reconciliation lifecycle powered by AI.

The Bottom Line

FinRecon transforms reconciliation from a manual bottleneck into a strategic advantage delivering speed, accuracy, and confidence at scale.
